

Scalability & Future Plan

Date	2 October 2026
Team ID	SWTID-2026-1309
Project Name	Pocket Smart AI
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Limited concurrent users may slow AI response.	Higher response time during peak usage.	High
2	Growing user data may increase storage needs.	Slower data retrieval as records increase.	Medium
3	Limited integrations and advanced AI features.	Reduced functionality for future use cases.	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports a limited number of concurrent users.	Use cloud scaling and load balancing to support more users.
2	Data Storage	Basic storage for current project data.	Move to scalable cloud storage with indexing and backup.
3	Performance	Performance may decrease with increased requests.	Add caching, asynchronous processing and performance monitoring.
4	Security	Basic authentication and access control.	Use role-based access, encryption and secure API controls.

Future Roadmap:

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 2	Personalized AI recommendations and smarter user assistance.	3-4 months	More relevant and useful AI interactions.
Phase 3	Cloud scaling, analytics and improved data management.	5-6 months	Supports larger users and growing data loads.
Phase 4	Advanced AI features and external service integrations.	6-12 months	Expanded functionality and future-ready automation.
