

Coding & Solution

Date	2-10-2026
Team ID	SWTID-2026-1309
Project Name	Pocket Smart AI
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
2. The solution should address the core problem statement and implement the key functional requirements.
3. Include all source files, configuration files, and setup instructions needed to run the application.
4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	Not provided
Programming Language(s)	Python, JavaScript, HTML, CSS
Framework(s) Used	Flask, React
Key Features Implemented	Expense tracking; spending categorization; AI budget insights; alerts and summaries.
Pending / Incomplete Features	Not specified in the project materials.
Setup / Run Instructions	Install dependencies, configure environment variables, and run the application server.

Code Quality Checklist

S.N o	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

Pocket Smart AI follows a modular structure with clear naming, comments, error handling, and reusable components. The project should be maintained under version control.
